For the prevention and cure o
BILIOUS AND MALIGNANT FEVERS
is recommended
HAHN's ANTI-BILIOUS PILLS

THIS Medicine has been attended with a degree of success highly grateful to the inventor s feelings in several parts of the West Indies and in the Southern and Middle States, &c.

The testimony of a number of person can be adduced, who have reason to believe that a timely use of this salutary remedy has, under Providence, preserved their lives when in the most alarming circumstances.

Facts of this conclusive nature speak more in favour of a medicine than columns of pompous eulogy founded on mere assertion.

It is not indeed presumptuously proposed as an infallible cure, but the inventor has every possible reason that can result from extensive experience for believing that a dose of these Pills taken once in every two weeks during the prevalence of our bilious fevers, will prove an infallible preventive; and further, that in the earlier stages of those diseases their use will very generally succeed in restoring health, and frequently in cases esteemed desperate and beyond the power of common remedies.

The operation of these pills is perfectly mild, so as to be used with safety by persons in every situation and of every age.

They are excellently adapted to carry off superfluous bile and prevent its morbid secretions—to restore and amend the appetite—to produce a free perspiration and thereby prevent colds which are often of fatal consequences. A dose never fails to remove a cold it taken on its first appearance: they are celebrated for removing habitual costiveness—sickness at the stomach and severe head-ache—and ought to be taken by all persons on a change of climate.

They have been found remarkably efficatious in preventing and curing disorders attendant on long voyages, and should be procured and carefully preserved for use by every seaman.

—

Hamilton's Elixir,

A sovereign remedy for colds, obstinate coughs, asthmas, sore throats, catarrhs, and approaching consumptions.—To parents who have children afflicted with the *HOOPING COUGH*, this discovery is of the first magnitude, as it affords immediate relief, checks the progress, and in a short time entirely removes the most cruel disorders to which children are liable. The Elixir is perfectly agreeable, and the dose so small that no difficulty arises in taking it.

Oscar, Junior,

Stands this season in Prince George's county, at Mount Air, adjoining Piscataway, and covers mares from Wednesday until Monday, and the balance of the week at Port Tobacco, in Charles county, at 30 dollars the season—the season ends the 1st day of August next. Fifteen dollars and one to the groom will be taken if paid in the season. Good pasturage for mares coming from a distance at Mount Air, for one dollar a week, and fed (if requested) with grain at market price.

Oscar was out of Dr. Edelen's celebrated running mare Floretta, by colonel John Tayloe's Oscar, a capital turf horse. Doctor Edelen's Floretta won more jockey club purses than any one horse perhaps on the continent, and performed a 4 mile second heat in less time over the City course than it was ever done before or since. Oscar, jr. is full sixteen hands high, stout, and uncommonly handsome.

An Act

Incorporating a Company to establish a Turnpike Road from Wiley's tavern, in the county of Fairfax, to a point of intersection on the Little River Turnpike Road, or on the line of the district of Columbia. Passed February 14, 1818.

BE it enacted by the General Assembly, that it shall be lawful to open books at Fairfax court-house, and in the town of Alexandria, under the direction of Francis Peyton, Augustine I. Smith, Wm. Moss, Johnston Cleveland, Amos Alexander, Mordecai C. Fitzhugh, Jonah Thompson, George Deneale and James H. Hooe, or any three of them, for receiving subscriptions to the amount of sixty thousand dollars, for the purpose of making a turnpike road from Wiley's tavern, in the county of Fairfax, to a point of intersection on the Little River Turnpike Road, or on the line of the district of Columbia, as shall be designated by the directors of the company herein after named.

When a sufficient number of shares shall have been subscribed, the subscribers, their heirs and assigns, shall be and they are hereby incorporated into a company by the name of "The Middle Turnpike Company," agreeably to the act, entitled, "An Act prescribing certain general regulations for the incorporation of Turnpike Companies."

This act shall be in force from the passing thereof.

Fan-Sash Making.

METAL FAN-SASHES, of various descriptions, will be made by the subscriber, at his shop, lower end of Duke street. The want of a Metal Fan-Sash Manufactory in Alexandria, has hitherto been severely felt by builders and others, who have been compelled to make use of wood, which is neither elegant nor durable. The various forms into which the metal can be shaped have given it a decided superiority, and the difference in the price is very trifling. The subscriber has been at considerable expence in procuring the necessary preparations, and relies on public enterprise for success in the undertaking.

Gentlemen in the country, by sending the dimensions of their sashes, can have them made at the same price as if in town.

Proposals

FOR Publishing by Subscription, and now ready for the press, a series of historical volumes, which when finished will assume the title of

Universal History Americanised;

Or, an historical view of
Europe, Asia, Africa and America,
from the earliest records to the nineteenth century—with a particular reference to the state of society, literature, religion, and form of government in the United States of America.

BY DAVID RAMSAY, M. D.

"Life is so short and time so valuable, that it were happy for us if all great works were reduced to their quintessence." *Sir William Jones.*

PROSPECTUS.

ASIA.

The Asiatic part of this work contains a general view of the antediluvians—of the general deluge—of the re-settlement of the Globe after that great event—of the primitive postdiluvian nations which were formed in Asia, the cradle of the world. Their various ramifications, revolutions, and of the general course of Empire.

AFRICA.

The African part, contains a concise history of Egypt, Carthage, Numidia, Mauritania, Abyssinia, of the Piratical States, and the Hottentots, with a grouped view of its uncivilized settlements.

EUROPE.

The European part, contains the history of Greece and Rome, from their origin to their dissolution—of the various nations which were conquered by them—and of the nations by which the Romans themselves were finally conquered, and of the nations which were formed from the fragments of the Roman Empire, and the various revolutions of the latter, together with a view of the nations which never were subjected to the Romans.

AMERICA.

The American part, contains a general history of the Western continent, under the heads of Free, European, and Aboriginal or unconquered America. The first contains a history of the United States, from their first settlement as English Colonies, till the present time.—The second, of all parts dependant on Europe.—And the third, of all that are still owned by the Aborigines.

It is expected that the whole will be comprised in 10 or 12 octavo volumes, of between four and five hundred pages each—to be printed in Philadelphia, on good paper and fair types, for $3 1-3 per volume, in sheep binding, or $4 1-3 Calf Gilt, to be paid for on delivery.

AUTHORITIES.

This work has been in contemplation upwards of 40 years. The project of it was conceived in 1786, on reading the Universal History, then recently edited in 60 volumes, by a society of gentlemen in England. The original idea of extracting the quintessence of that voluminous work, which contained the most complete system of history the world had then seen, has ever since been enlarging and improving by an attentive perusal of the histories written by Robertson, Hume, Gibbon, and other modern authors—of the Asiatic researches—of the works of Sir William Jones, and other learned Orientalists—the publications of intelligent travellers, who, in the course of the last half century have explored almost every region of the Globe. These collectively have thrown a blaze of light on countries comparatively unknown, and on portions, both of ancient and modern history which were confused and obscure at the period when the writers of the Universal History published their work. The arrangement of materials collected from these sources commenced in the year 1780, when, in consequence of the surrender of Charleston to Sir Henry Clinton, the author was suddenly released from a sea of business and sent as a prisoner of war to the British Garrison then in St. Augustine, and there confined for eleven months, without any peculiar employment. Steady progress has been made for the last ten years in correcting and transcribing the work for publication.

UNITED STATES.

The History of the United States is given at full length—that of foreign countries is more or less expended or contracted in proportion to the intrinsic importance of each—its tendency to illustrate portions of Holy Writ—the Greek and Latin Classics—and also in proportion to its connexion with the U. States, or as furnishing useful practical information to its citizens, or as the paternal soil of their ancestors.

The above sketch of the nature and objects of this immense work, which has occupied the attention of the Author for upwards of 40 years, was found among his papers, and is now given to the public in his own words. Since that period, a few chapters have been added by the Reverend SAMUEL STANHOPE SMITH, which brings it down to the close of the last war.

The publication commences with a third impression of the History of the U. States, in three volumes, which is all that has ever appeared. The whole will not be delivered under 15 or 20 months. It is proper to state, that the gentlemen who have the direction of it are neither booksellers nor printers, and receive no pecuniary consideration for their trouble—but are willing to make the necessary advances to carry it into execution provided the sale is warranted by public patronage. The profits arising are to be appropriated for the support and education of his children, four of each sex: to them its success is a matter of deep importance.

THE POLAR ICE.

The Quarterly Review for February, 1818, contains an interesting article on the subject of—"The Polar Ice, and Norther Passage into the Pacific." This subject is introduced under a notice of Lieut. Chappell's "Narrative of a Voyage to Hudson's Bay in his Majesty's ship Rosamond;" and the writer has collected a body of important evidence to show, that the immense masses of ice, which for several centuries past, have been accumulating on the coast of Old Greenland, have, by some unexplained cause, been parted from that bleak and inhospitable shore, and have disappeared. It is stated that that shore has been, for nearly four hundred years, shut up, and rendered inaccessible, by a vast frozen barrier, and that some colonies of Danes and Norwegians, who had settled in Greenland, had, for that long period, been cut off from all communication with the rest of the world, and their fate has been, of course, entirely unknown.

The disappearance of the Polar-Ice is supposed to rest on no ordinary foundation. Its appearance in a more southern latitude, in the years 1815—1816—and 1817, has been witnessed by many navigators, on their voyages from the West Indies and this country, to Europe, as well as from Great Britain to Halifax and Newfoundland. Multitudes of immense islands of ice have been discovered as far as the fortieth parallel of latitude. Some of them were what are called "ice Bergs," rising to the height of more than 100 feet above the water—others were flat islands of great extent. Indeed, in one instance a packet from Halifax passed, in April, 1818, near to a mountain of ice nearly 200 feet in height, and about two miles in circumference.

To the effect which these prodigious bodies of ice have produced upon the atmosphere, is the uncommon coldness of the few seasons past supposed by many persons to be owing. That the ice had left the Greenland coast was first stated by some of the fishermen, on their return in August, 1817. This was followed by a newspaper account, that a brig from Bremen, after making Jan Mayen's land, about 71 leagues N. had sailed to the westward after seals, and found land in 72 degrees; and that he then stood nearly due north along the coast, without seeing ice, observing the bays, and inlets, and other appearances of land, till he came to lat. 81 degrees and 50 seconds, from whence he steered to the westward for several days, when, after losing sight of land, he turned his course to the southward and eastward, and in 78 degrees N. fell in with the first fishing vessel he had seen. This statement was corroborated very particularly by the masters of five different whaling vessels.

In addition to these accounts, it is stated that the testimony of Mr Scoresby the younger, is directly in point. In a letter to Sir Joseph Banks, he says — "I observed in my last voyage (in 1817) about two thousand square leagues (18.000 square miles) of the surface of the Greenland seas, included between the parellels 76° and 80°, perfectly void of ice, all of which has disappeared within the last two years." He further states, that though on former voyages he had rarely been able to penetrate the ice, between the latitudes of 76° and 80°, so far to the west as the meredian of Greenwich, on his last voyage he twice reached the longitude of 10° west, and in the parallel of 70°, he twice approached the coast of Old Greenland; and there could be no doubt but he might have reached the shore had he had a justifiable motive for navigating an unknown sea at so late a season of the year. On returning to the southward, he actually landed on Jan Mayen's island, and brought away specimens of the rocks.

Intelligence was also received at Copenhagen, from Iceland, in September, 1817, of the ice having broken loose from the opposite coast of Greenland, and floated to the southward, after having surrounded the shores, and filled the bays and creeks of that Island; and that this had occurred twice in the same year—a circumstance unknown to the oldest inhabitant.

It is supposed that the departure of the ice is ascribable to the fact of its having broken off, after accumulating for such a length of time, by its own weight. It has also been observed as a remarkable coincidence, that its removal was contemporaneous with the period about which the variation of the magnetic needle to the westward became stationary.

The fact of the disappearance of the ice, having become well established, it presents an interesting enquiry—Whether any, and what advantages may arise out of an event which has now occurred for the first time for several hundred years—and the Reviewer enumerates the following, viz.

1. The influence which the removal of so large a body of ice may have upon the climate of Great Britain.

2. The opportunity it affords of enquiring into the fate of the long-lost colony on the eastern coast of Old Greenland.

3. The facility it offers of correcting the defective geography of the aretic regions in the western hemisphere; of attempting the circumnavigation of Greenland, a direct passage over the pole, and the more circuitous one along the northern coast of America, into the Pacific.

Some curious facts are stated, on the influence of large bodies of ice, upon the temperature of the atmosphere, particularly in Iceland. That island is said once to have been covered with impervious woods; and that many places which still bear the name of *forests*, now produce nothing but stunted shrubs of five or six feet in height. This extraordinary change is ascribed to the effect produced on the climate by the neighboring masses of ice on the coast of Greenland.

The change of temperature in Great Britain, within the last two or three years, since the descent of the ice into the Atlantic, is proved by a comparison of the meteorological register of the Royal Society for 1805 1806, and 1807, with that of 1815, 1816, and 1817.

This is followed by a historical account of the Norwegian and Danish colonies. The latter is stated to have settled in Greenland as early as the year 983. The country is said to have received its name from its superior verdure to Iceland. In the year 1406 the ice closed in upon the coast, and rendered it inaccessible; and from that time till the last summer all communication with the colonies appears to have been cut off.

Attempts have from time to time been made to learn their fate. As late as the year 1786, captain Lawenorn, of the Danish navy, was sent out expressly for the purpose, but it is understood, without success. The opportunity now offering, it is presumed will be improved. Even if the whole of this unfortunate race have, as is much feared, perished, it is hoped, that some vestiges of their situation, after the ice shut them in, may be traced.

With regard to the geography, it is supposed that an opportunity is at last presented, by the departure of the ice, to ascertain the true state and position of the polar regions. Greenland is thought to be either an island or a cluster of islands. In support of this conjecture, it is said that a strong perpetual current sets down from the northward along the eastern coast of America, and the eastern shores of Old Greenland, affording a strong presumption that there is an uninterrupted communication between Davis's Strait and the great polar basin.—Vast quanties of drift-wood are also floated down this northern current, and down the eastern side of Greenland, sometimes filling the bays on the northern coast of Iceland. It is said that this wood could not have grown to the northward, as not a stick, except that of a merely dwarfish size, is to be found in a growing state for many degrees below where these logs are cast up. That many of them have recently been in a growing state, is apparent from the fragments of bark and branches adhering to them. They are of kinds which are produced both in Asia and America; and are supposed to have floated down the rivers in those continents, into the polar basin, and from thence through the outlet into the northern ocean.

An additional argument in favor of the insularity of Old Greenland is derived from the fact, that whales struck with harpoons on the coast of Spitzbergen, are very commonly killed in Davis's Strait, with the harpoon in their bodies, and *vice versa*. There can be no mistake here, as the names of the vessels, &c. to which they belong, are always cut in the sockets of their harpoons. Capt. Franks, in 1805, struck a whale in Davis's Strait, which was killed near Spitzbergen by his son, who found his father's name on the harpoon sticking in the fish's body.

The discovery of a northern passage, which has so often been attempted, and as often failed, is again exciting attention, and will be renewed. The Kamtschatka, a Russian frigate, under the command of captain Golovnin, whose interesting account of his imprisonment in Japan has been lately published, has proceeded on a voyage with this view. Two expeditions, of two ships each, are fitting out for the same purpose, in Great Britain. The one is to proceed to the polar basin, and passing close by the pole, to make a direct course to Behring's Strait; the other to push to Davis's Strait for the north east coast of America.—Should these attempts prove successful, it will be considered, for many reasons, one of the most interesting events to science that ever occurred.

We have endeavored to give a summary statement of the contents of this entertaining and interesting article in the Quarterly Review, presuming that from its very nature it must be amusing to our readers.

ALEXANDRIA:
THURSDAY, MAY 21, 1818.

LUXURY.

Amongst the various disturbers of the peace and comforts of life, there exists a class of malcontents whom I call *Croakers*, and who, to borrow the aid of a bull, I would say are never easy but when they are miserable. Free countries abound with these more than despotisms, because having few real evils to contend with, their miseries are created by the imagination, and the workings of the imagination know no bounds. England has therefore at all times teemed with croakers—the times were very hard there indeed, if a pretext of some kind or other is not to be found for being miserable. Either the corruption of government or the knavery of opposition was always at hand to supply food for uneasiness, and to save the lovers of melancholy from the awkward circumstance of being tranquil or cheerful. "Poor Dick Doleful!" says the Croaker of Goldsmith's comedy, in a whimper—He and I used to be so comfortably miserable together!—Dick used to say that croaker was rhyme to joker, and we would rhyme together" In this country where we more resemble the English than we are aware of, we should be heard croaking, too, in the same style, were it not that the weight of our melancholy is counterbalanced by our peevish patriotism, and that our luqubrious feelings and wailings instead of running out at our eyes, and being vented in ohs, and ahs through the thorax, are vomited forth in ink through the columns of the public journals;—a mode of querulousness which has gradually become so habitual to us, that we too frequently indulge our private personal griefs in the same way as our public state troubles, and complain of the perfidy of a friend, the selfishness of a neighbor, and sometimes even of the backsliding of a wife, in the same way and through the same medium that we should impeach a minister, expose the conduct of government, or chastise the profligacy of a corrupt statesman.

Yet we are upon the whole sufficiently adroit in making ourselves uncomfortable—and it is not at all uncommon to see one column of a newspaper filled with censures upon the inactivity of those whose business it is, in promoting this or that improvement, and urging, as the first duty of patriotism, the adoption of various measures for elevating the country to a successful rivalship with the refinements and voluptuousness of the old world—while the next contains pathetic denunciations against grandeur, over refinement, luxury and splendor, as being subversive of republican simplicity and virtue, and therefore, in the end, subversive of our happy state of national freedom and independence. The former seeming to forget, all the time, that we could not make more rapid strides to grandeur and luxury than we are already making, though satan himself were to ascend and lay his burning paw upon our backs to push us forward; and the latter to want the skill to know that nothing in the ordinary course of human affairs can prevent us from being the richest people in the world, and that therefore nothing but the miracle—the Great Disposer himself deigning in pity to us, to make us what beings merely human never yet were—wise yet full, and gifted at once with those two irreconcileable possessions, power and self-denial.

Never were the vanity of human wishes, and the incompetence of man to the purposes of perfect freedom or earthly enjoyment, better illustrated than by this dilemma in his condition. He cannot be rich without being luxurious—he cannot be luxurious without being vicious—and he cannot be vicious without becoming enslaved and miserable. I say this of whole societies only, not of each individual; being convinced that men may be, and often are luxurious without being wicked—and that there is nothing in which the higher and better bred classes of society are so pre-eminently and advantageously distinguished from the vulgar, as by the faculty of bearing opulence without injury to the moral character—of being wealthy without gross indulgence of the appetites—and of being luxurious, in the most refined conception of the word, without being abandoned to wickedness or sensuality.

Luxurious, however, we must be, let wisdom or morality inveigh against it as they will. Our population are all more or less, comparatively opulent, and will therefore indulge in the gratification of artificial wants. In that indulgence luxury, properly so called, consists; and without that luxury no great naval and commercial nation can subsist. The only thing, therefore, to be done in our case is, if it be practicable, to draw a precise line where allowable innocent superfluity shall cease and vicious gratification begin. With such a landmark well established considerable latitude might be given to luxury. But that can scarcely ever happen in a nation where the moral taint begins with youth; where children are habituated to the most gross gratifications of the apetites; and where boys, not yet arrived at their *teens*, are trained to the excitement of an artificial thirst, and, of necessary consequence, to drunkenness, by the constant use of tobacco.

WILLIAM R. SWIFT, esq of the house of Adams & Swift, Baltimore, has been appointed Portuguese consul for that district, in place of S. Cary, esq. resigned.

From the Norfolk Herald, May 16.

THE NONSUCH—PUT BACK.

We regret that the U. S. Nonsuch, lieutenant commandant Claxton, which sailed from this port on Thursday 14th ins. for Annapolis, to convey the *President of the United States* to this place, returned to port yesterday afternoon about 3 o'clock, having very badly sprung her foremast. She succeeded in beating into the Bay against a strong easterly wind, and a few minutes after having shaped her course, she met with the misfortune above mentioned, which rendered her return indispensable. She will be refitted with all despatch, and proceed to her original destination.

A GREAT SEA SERPENT!

[The following is a very interesting account of the Sea serpent, seen on Saturday last. The respectability of the source of the annexed certificates, places the matter beyond a doubt—and we think Capt. Woodward has had a more minute view of this Serpent than it was possible for any one to have had of the one seen last summer off Cape Ann.] *Gaz.*

AFFIDAVIT.

I, Joseph Woodward, master of the schooner Adamant, of Hingham, on my passing from Penobscot to Hingham on Saturday last, at 2 o'clock, P. M. Agamenticus bearing W. N. W. 10 leag. distance, discovered something on the surface of the water, apparently about the size of a ship's long boat. Supposing it to be the wreck of a vessel, I made towards it; and on approaching it, to my surprize and that of my crew, discovered it to be a monstrous sea serpent—as we approached him he threw himself into a coil,* and darted himself forward with amazing velocity—the wind being ahead, it became necessary to stand on the other tack, and as we approached him again, he threw himself into a coil as before, and came across our bows at not more than sixty feet distance.

Having a gun charged with a ball and shot, I discharged the contents of it at his head. The ball and shot were distinctly heard to strike him and rebound as tho' fired against a rock—he, however, shook his head and tail most terribly—he again threw himself into a coil and came towards us with his mouth wide open. In the mean time, I had charged my Gun again, and intended to have discharged the contents of it into his mouth; but he came so near us I was fearful of the consequences, and withheld it—he came close under the bows of the schooner, and had she not been kept away, must have come on board of us—he sunk down under the vessel, his head a considerable distance on one side of the vessel, and his tail on the other—he played around us about five hours—I and my crew had probably the best opportunity of seeing him that has occurred. I judge him to be, at least, twice the length of my schr. say one hundred and twenty feet—his head was about the size of a ship's long boat, say fourteen feet—his body, below the neck, at least six feet diameter—his head was large in proportion to his body—his tail was formed like a squid's—his body was of a dark color, and resembled the joints of a shark's back bone—his gills were about twelve feet from the end of his head, and his whole appearance was terrific.

His manner of throwing himself into a coil appeared to be done by contracting his body in a number of places in perpendicular directions, and placing his tail so as to throw himself forward with great force—he could contract and throw himself in any direction, with apparently the greatest ease and most astonishing celerity. JOSEPH WOODWARD.

Hingham, May 12, 1818.

* The word "coil" does not exactly represent the idea of the serpent's appearance; but from a more particular description given by captain Woodward, it was of an undulatory appearance.

Having read the above statement of captain Woodward, we certify to the correctness of it.

Alex'a. Common Council.

MAY 16, 1818.

Ordered, That the heirs of David Griffith, deceased, do fill up a sunken lot on which there is a nuisance, between Queen and Princess and Pitt and St. Asaph streets, on or before the 4th day of June next, and in default thereof, that the superintendent of police do cause the same to be filled up, and charge the expense to the proprietors of the lot.

A petition from George Grayson, a colored man, was received and read, and thereupon it was ordered, that the said petition be referred to Messrs. Gird, Mc Guire, and Wise, with directions to inquire into the same, and make a report to council.

Ordered, That the list of delinquents in fire buckets returned by the assessors be placed in the hands of the auditor, and provided the law is not complied with on or before the first day of July next, that the list be returned to the mayor, in order that the fines be then collected.

Mr. Wise from the committee appointed on the petition of Isaac Gibson, made a report on the subject, which was upon motion laid on the table.

Ordered, That the superintendent of police have the drain cleaned between Princess-street and the bridge on Fairfax street; and charge the expense to the second ward, provided it does not exceed twenty dollars.

The act to prevent dogs going at large in the market-house, was read a second and third time, and passed.

A Teacher Wanted.

SINCE the annunciation of Colonel Smith's intention to decline devoting the whole of his time to the duties he has hitherto so satisfactorily discharged, and there being a probability that he will e're long abandon, altogether, his situation in the Academy it is the wish of many parents in this place to obtain a Teacher, and establish a school, independent of the Academy. For this purpose therefore, a gentleman qualified by his age, experience and capacity is wanting, and would be very liberally encouraged.—He must be a man of liberal and enlightened mind: thoroughly acquainted with the languages, Mathematics, &c.—Communications, postage paid, may be made to the editor of the Winchester Gazette who will promptly reply to all such.

350 Acres of Land for sale.

The subscriber wishes to sell 350 acres of LAND in the upper part of Prince William county, Va. lying immediately on the road leading from Haymarket to Leesburg, and about 3 miles from Aldie mills, from which latter place there is a turnpike road to Alexandria, distant 33 miles. One half of this farm is covered with a heavy growth of timber, such as white oak, black oak, hickory, locust, &c. The buildings are all new and in good order. As there is a saw mill erecting on an adjoining farm the timber may be converted into plank with convenience. This land is well watered, and none more susceptible of improvement or better adapted to the use of clover and plaister. Persons desirous of purchasing would do well to call and see it, as a great bargain may be had. For terms apply to the subscriber living on the premises.

N. B. If this land is not sold before the first day of October next, it will then be offered at public sale.

600 acres of Land for sale.

THIS Tract is situated in Westmoreland county, Virginia, adjacent to Mr. Garnett Hunter's Plantation, and contiguous to the waters of the Potomac. The neighborhood is good—water excellent, and very desirable situations for building. A considerable proportion of the land is well timbered, besides a good deal of cedar pine and other wood, sufficiently convenient to make it an object for those who may be disposed to send it to market—it is nearly equi-distant from Baltimore, Washington and Norfolk.

Any one wishing to purchase may apply to ROGER JONES,
Alexandria.

Also, a very valuable LOT, containing 140 acres, being a part of the late Mr. John Turberville's tract—within 6 miles of Georgetown, 3 from the Little Falls Bridge, and near to the turnpike leading from thence to Wiley's, in county, Va. A great proportion of this land is exceedingly well timbered, and that part which is not, is so recently cleared as to be in an active state for cultivation, and already in a productive condition.—For terms, apply to PHILIP C. Valuable Family Medicines.

JUST received, direct from the proprietors, the following valuable MEDICINES, all of which have been in use for a number of years past, in almost every part of the United States; have been highly patronized by people of the first respectability; and approved by those who have had occasion to make use of them, for the cure of those disorders for which they are severally calculated.

Dr. Lee's Genuine (Windham) Bilious Pills,

Universally known and used throughout the United States as a family medicine. The fame of these pills has become so great, that many have attempted to counterfeit them—to guard against this, the proprietors have procured a stereotype label, and each box of Genuine Lee's Pills will hereafter be enclosed in one of these labels, with these words on the sides: "Lee's Genuine Windham Bilious Pills," and on the end of the label the words, "Samue Lee, patentee, &c. I. Thompson, agent, joint proprietor," &c. and should any be offered for sale without said label on them the purchaser may be apprised that they are counterfeit.

Dr. Thompson's celebrated Eye Water,

For the cure of inflamed and sore eyes of almost every description. This valuable preparation comes highly recommended from the most respectable sources.—Price 50 and 25 cents a bottle.

Dr. Rawson's Genuine Itch Ointment,

A certain and safe cure for that disagreeable complaint, as well as other irruptions of the skin. Price 37½ cents a box.

Dr. Rawson's Anti-Bilious and Stomachic Bitters,

For weakly and infirm constitutions. Price 37½ cents a box.

Hinckley's Infallible Remedy for the Piles,

A most valuable medicine. Price 50 cents a box.

Thompson's Aromatic Tooth Paste,

For whitening and preserving the teeth—it may be used with the greatest safety. Price 50 cents a box.

Specific Drops for the Tooth Ache,

Which, in almost every case, gives instant relief in that distressing complaint. Price 37½ cents a bottle.

Cooley's Vegetable Elixir, for Coughs, Asthmas, Consumptions, &c.

A very valuable medicine in those complaints. Price 50 cents a bottle.

For sale, in Alexandria, by Dr. *Rich'd. H. Litle*; in Washington City, by Dr. *David Ott*; in Georgetown, by Dr. *John Ott, Otho M. Linthium & Co.* and *Nathaniel Jewitt.*

James Kennedy & Son,

RESPECTFULLY inform the public that they have just received from

LEE's MEDICINE STORE,

No. 46, Maiden lane, New-York, a fresh supply of the following valuable MEDICINES:

Hamilton's Worm destroying Lozenges,

Which have within sixteen years past cured an immense number of persons of both sexes of every age and in every situation, of various dangerous complaints arising from WORMS, and from obstructions or foulness in the stomach and bowels.

This medicine bears no analogy whatever to others of similar titles so commonly complained of as operating with violence; on the contrary a particular excellence of this remedy is its being suited to every age and constitution. It contains nothing but what is perfectly innocent & is so mild in its operation that it cannot injure the most delicate pregnant lady or the tenderest infant of a week old should no worms exist in the body; but will without pain or griping cleanse the stomach and bowels of whatever is foul or offensive, and thereby prevent the production of worms and many fatal disorders. The lozenges are particularly efficacious in carrying off all gross humours and eruptions, feverish and bilious complaints, and are the safest and mildest purgative that can be used on any occation.

Description of Worms, and the symptoms by which they are known.

Worms which infest the human body are chiefly of four kinds viz.—The Teres or large round worm; the Ascarides or small maw-worm; the Cucurbitine or short flat white worm; and lastly, the Tænia or tape-worm, so called from its resemblance to tape. This is often many yards long and is full of joints. It is most hurtful and most difficult to remove.

Among the symptoms attending worms are—disagreeable breath, especially in the morning; bad and corrupted gums; itching in the nose, and about the seat; convulsions, epileptic fits, and sometimes privation of speech; starting and grinding of the teeth in sleep; irregular appetite, sometimes loathing food and sometimes voracious; purging with slimy and fœtid stools; vomiting; large and hard belly; pains and sickness at the stomach; pains in the head and thighs and lowness of spirits; slow fever with small and irregular pulse; a dry cough; excessive thirst; sometimes pale and unhealthy countenance, and sometimes the face bloated and flushed.

Persons afflicted with any of the above symptoms should have immediate recourse to Hamilton's Worm Destroying Lozenges, which have been constantly attended with success in all complaints similar to those above described.

A dose of this medicine given occasionally during the warm season, will effectually prevent "the vomiting and purging of children"—a dreadful disorder, which annually destroys thousands of the infant part of our citizens. It is likewise the mildest and most certain remedy known, and has restored to health and strength a great number when in an advanced stege of this fatal complaint. Particular and plain instructions are given for every part of the necessary treatment in such cases.

Children generally take this medicine with eagerness; having a pleasing appearance, and an agreeable taste.

The Restorative Powder for the Teeth and Gums.

For the prevention and cure of BILIOUS AND MALIGNANT FEVERS is recommended

HAHN's ANTI BILIOUS PILLS

THIS Medicine has been attended with a degree of success highly grateful to the inventor's feelings in several parts of the West Indies and in the Southern and Middle States, &c.

The testimony of a number of person can be adduced, who have reason to believe that a timely use of this salutary remedy has, under Providence, preserved their lives when in the most alarming circumstances.

Facts of this conclusive nature speak more in favour of a medicine than columns of pompous eulogy founded on mere assertion.

It is not indeed presumptuously proposed as an infallible cure, but the inventor has every possible reason that can result from extensive experience for believing that a dose of these Pills taken once in every two weeks during the prevalence of our bilious fevers, will prove an infallible preventive; and further, that in the earlier stages of those diseases their use will very generally succeed in restoring health, and frequently in cases esteemed desperate and beyond the power of common remedies.

The operation of these pills is perfectly mild, so as to be used with safety by persons in every situation and of every age.

They are excellently adapted to carry off superfluous bile and prevent its morbid secretions—to restore and amend the appetite—to produce a free perspiration and thereby prevent colds which are often of fatal consequences. A dose never fails to remove a cold if taken on its first appearance: they are celebrated for removing habitual costiveness—sickness at the stomach and severe head-ache—and ought to be taken by all persons on a change of climate.

They have been found remarkably efficatious in preventing and curing disorders attendant on long voyages, and should be procured and carefully preserved for use by every seaman.

Hamilton's Elixir,

A sovereign remedy for colds, obstinate coughs, asthmas, sore throats, catarrhs, and approaching consumptions.—To parents who have children afflicted with the *HOOPING COUGH*, this discovery is of the first magnitude, as it affords immediate relief, checks the progress, and in a short time entirely removes the most cruel disorders to which children are liable. The Elixir is perfectly agreeable, and the dose so small that no difficulty arises in taking it.

Hamilton's Grand Restoraitve,

Is recommended as an invaluable medicine for the speedy relief and permanent cure of

Nervous Disorders	Violent cramps in the stomach and back
Consumptions	Indigestion
Lowness of spirits	Melancholy
Loss of appetite	Gout in the stomach
Impurity of b'ood	Pains in the limbs
Hysteric'l affection	Relaxations, etc.
Inward weaknesses and debility	

Hamilton's Essence and Extract of Mustard.

A safe and effectual remedy for acute and chronic rheumatism, gout, rheumatic gout, palsy, lumbago, numbness, white swellings, chilblains, sprains, bruises, pain in the face and neck, etc. etc.

Lee's Ointment for the Itch.
